EXPERIENCES

+ 4 years

Senior Engineer / Cloud (DevOps)

— ELCA Cloud Services / Secutix

06.2022 - now

- Initiated and maintained EKS cluster hosting GitLab, HashiCorp Vault, and CI/CD runners; later migrated services to Bitbucket Cloud and VM-based Vault cluster with automated backup/restore
- Designed and implemented a new automated release deployment pipeline (close to MVP) in collaboration with technical lead
- Refactored infrastructure-as-code (Terraform) across AWS + OCI: centralized template metadata, built a versioning module enforcing consistency across all environments
- Conducted PoC for ARM-based instances (internet-facing machines); evaluated cost/benefit of full ARM migration
- R&D on Terraform execution governance: evaluated Atlantis, GitLab pipelines, and dynamic child-pipeline approaches for MR-gated deployments
- Assisted PKP performance benchmarking: configured cross-cloud DoS infrastructure, industrialized WAF rules in Terraform, gathered cost analysis
- Provided L3 infrastructure support and interim Product Ownership for PeakProtect

7 months

DevOps Engineer

— Nexthink SA, Lausanne

10.2021 - 05.2022

Support and improvement of large-scale EKS infrastructure (~1K nodes) and CI/CD migration planning

3 years

Software developer / DevOps Jr

— Olympe.ch, EPFL

11.2018 - 10.2021
EKS management, GitOps CI/CD pipelines, automated release process, and monitoring setup

2 months

Frontend developer Jr

— Infomaniak SA, Geneva

09.2018 - 11.2018
Bug-fixes on Angular web interface

6 months

Contract software developer

— FIVB, Lausanne

11.2017 - 01.2018 / 07.2018 - 09.2018
TCP/IP messaging library and real-time statistics entry tool (Node.js, Electron, React)

TRAINING

2016 - 2018

Technician ES Development

— CPNV, Ste-Croix
Web / mobile development specialization with MVC frameworks (Rails, Aurelia, Ionic)

2012 - 2016

Informaticien CFC

— CFPSion / RETEL Collombey SA
General computer science apprenticeship with full IT management for local SMEs

TECHNOLOGIES

DEVOPS

GitLab CI / Jenkins / Bitbucket Pipelines

Terraform / Ansible Kubernetes / EKS / Helm

Prometheus / Grafana / ELK AWS / OCI

Linux: Debian / NixOS

DEV STACK

Bash Node.js / TypeScript ~ Rust ~ Golang

~ Java ~ Python
